

Exception hierarchy in PHP7

«interface» Throwable
getMessage() :string
getCode() :int
getFile() :string
getLine() :int
getTrace() :array
getTraceAsString():string
getPrevious():Throwable
__toString() :string

Error / Exception
#message:string
#code :int
#file :string
#line :int
+__construct(message :string ='' code :int =0 previous:Throwable =null)
+getMessage() :string {leaf}
+getPrevious():Throwable {leaf}
+getCode() :mixed {leaf}
+getFile() :string {leaf}
+getLine() :int {leaf}
+getTrace() :array {leaf}
+getTraceAsString():string {leaf}
+__toString() :string
-__clone() :void {leaf}

ErrorException
#severity :int
+__construct(message :string ='' code :int =0 severity :int =E_ERROR filename :string =__FILE__ lineno :int =__LINE__ previous :Exception =null previous :Throwable =null)
+getSeverity() :int {leaf}

only difference with Exception
